Baseline Medical offers state-of-the-art cardiovascular health screenings. Employers consider various options when they try to select meaningful benefits for their employees.

Stroke is reported to be the # 1 reason that employers lose productivity from their work force. Realizing the impact of losing any of our key people through injury or disability was something we wanted to avoid.

Wilmer R. Schultz, Inc. decided to include the evaluation for Stroke risk in our recent Health Fair and we had Baseline Medical deliver this new feature. Our event was well attended and proved successful due in large part to the efficiency of the professionals who did the staffing and planning.

Baseline Medical brought hospital quality imaging into our workplace and they truly elevated the integrity of our wellness event. Each employee could view the screen and see their blood flow. In just a few minutes they were offered the results and left knowing about their own Stroke risk.

Our HR staff also noted how pleased the employees were with how the company demonstrated interest in them on such a personal level.

Given all of the benefits we received and the goodwill that was generated we are pleased that Baseline Medical helped to make our company Health Fair such a success. Every company, regardless of their size, should really consider having Baseline Medical for their next Health Fair.

WILMER R. SCHULTZ, INC.
